

An open letter from our Executive Director,  
Cheryl Sjoberg, MSW, LICSW:

This is a scary time in our history! We are all having to make changes in how we live our lives in order to stay safe and to keep those we love safe.

At *CHOICES Women's Resource Center*, we want to help you to make good choices about your health. We are available to help you review all the important factors that go into your decision about an unplanned or crisis pregnancy. Safely!

Many of our services are still available by phone and computer. Please call us at (909)258-9272. During our regular hours, we will have a caring professional answer the phone and help you get all your questions answered. We have both counselors and nurses available for those needs.

All of our services and referrals are at no cost to you. If you need material resources such as diapers, wipes, or other such items, we will arrange a safe method of getting those to you.

We look forward to hearing from you!

Sincerely - Cheryl
